A small management team

CB European Quality Fund

Investing is a complex problem-solving practice, where the playing field is constantly changing

In our opinion, a small team is best suited to the challenges associated with investing

The benefits are imminent for both the team members and its investors

Jeff Bezos, founder of Amazon.com:

If a team cannot be fed by two pizzas, the team is too big

Strengths of small teams

- It is easier to establish robust relationships with deep trust in small teams
- Group affiliation, individual responsibility and the sense of collective ownership of portfolios are strengthened in smaller teams
- Good investment decisions are based on cooperation to identify which data is important. A small team with few communication paths facilitates collaboration and enhances the decision-making process.

3 persons = 3 pathways

6 persons = 15 pathways

9 persons = 36 pathways

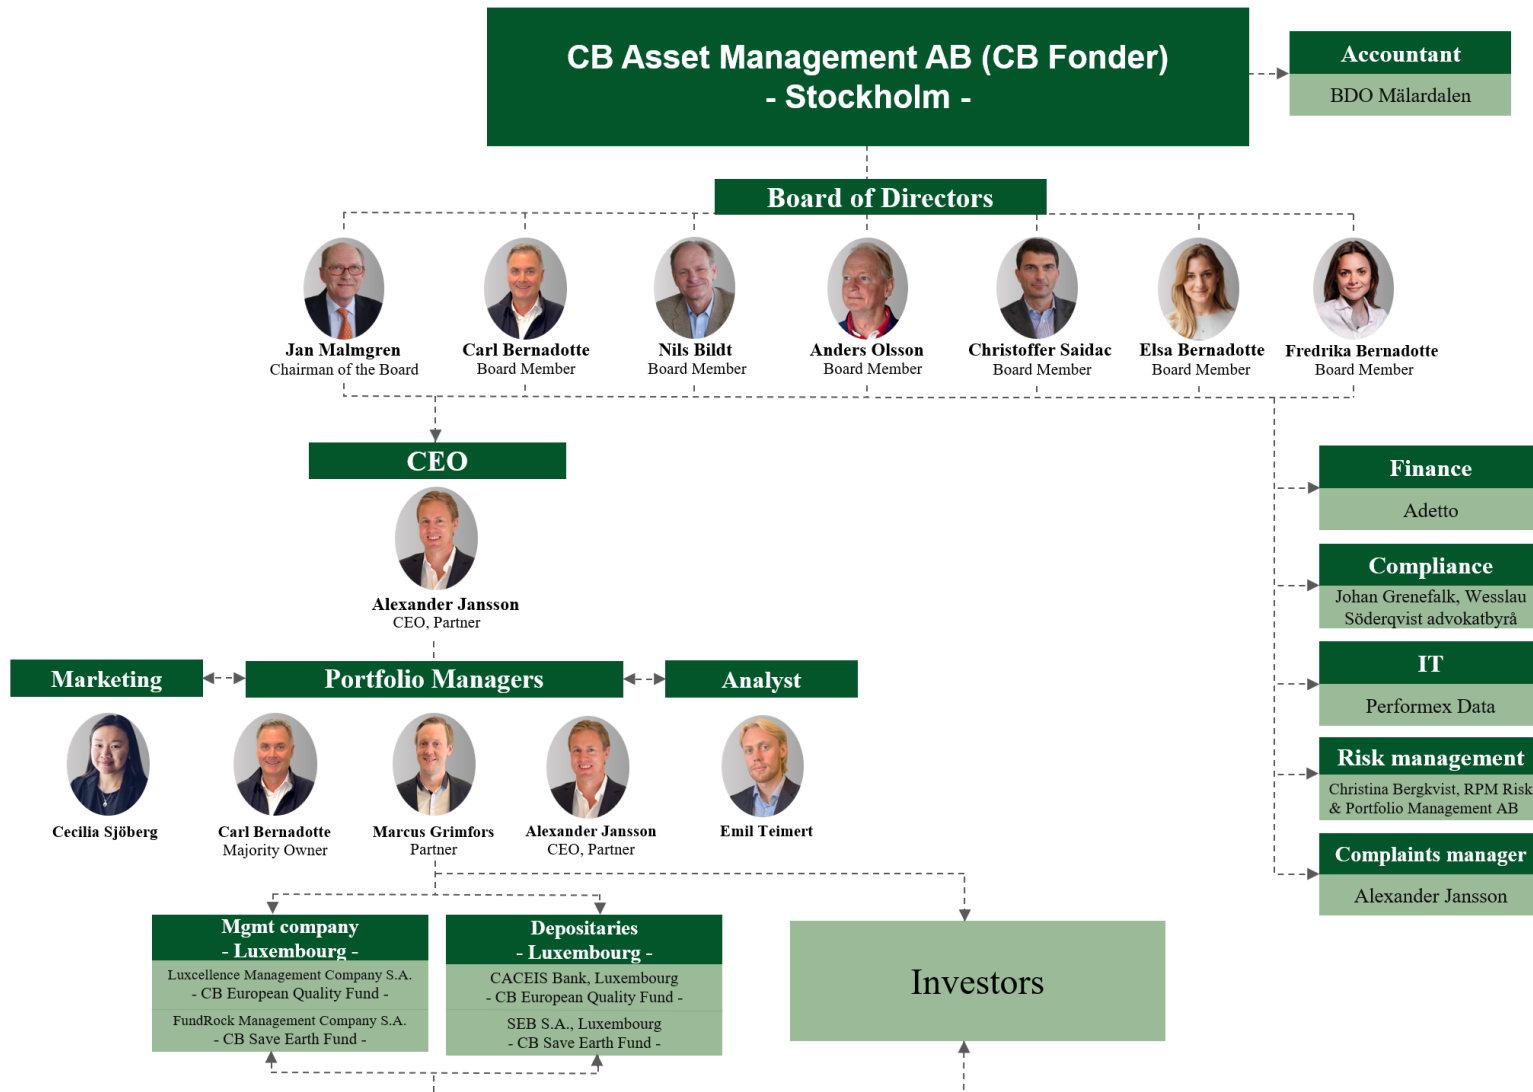

12 persons = 66 pathways

The picture illustrates how the number of communication pathways increases quadratically as the number of persons in the team increases

Performance per region

CB European Quality Fund

- The US market has outperformed historically much and for a historically long period of time, both on a rolling 60 and 120 months.
- As the regions Europe and the United States have demonstrated a tendency towards mean-reversion in their long-term development, it is reasonable to assume that Europe may soon emerge as a superior performer. While this imply a relative underperformance for the United States, it does not necessarily imply a negative absolute performance.
